International application No. <b>PCT/AU2004/001012</b>	<div style="display: flex; justify-content: space-between;"><div>International filing date (<i>day/month/year</i>) <b>30 July 2004</b></div><div>(Earliest) Priority Date (<i>day/month/year</i>) <b>31 July 2003</b></div></div>
Applicant <b>MEDIGARD LIMITED et al</b>	

This international search report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau.

This international search report consists of a total of **6** sheets.

☒ It is also accompanied by a copy of each prior art document cited in this report.

**Basis of the report**

- a. With regard to the language, the international search was carried out on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.
- ☐ The international search was carried out on the basis of a translation of the international application furnished to this Authority (Rule 23.1(b)).
- b. ☐ With regard to any nucleotide and/or amino acid sequence disclosed in the international application, see Box No. I.
2. ☐ Certain claims were found unsearchable (See Box No. II).
3. ☒ Unity of invention is lacking (See Box No. III).
4. With regard to the title,
- ☐ the text is approved as submitted by the applicant.
- ☒ the text has been established by this Authority to read as follows:
- Cannula/catheter introducer with retractable needle**

5. With regard to the abstract,
- ☐ the text is approved as submitted by the applicant.
- ☒ the text has been established, according to Rule 38.2(b), by this Authority as it appears in Box No. IV. The applicant may, within one month from the date of mailing of this international search report, submit comments to this Authority.
6. With regard to the drawings,
- a. the figure of the drawings to be published with the abstract is Figure No. **2**
- ☐ as suggested by the applicant.
- ☐ as selected by this Authority, because the applicant failed to suggest a figure.
- ☒ as selected by this Authority, because this figure better characterizes the invention.
- b. ☐ none of the figures is to be published with the abstract.

## INTERNATIONAL SEARCH REPORT

International application No.  
PCT/AU2004/001012**Box No. II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)**

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:  
because they relate to subject matter not required to be searched by this Authority, namely:
2. ☐ Claims Nos.:  
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:
3. ☐ Claims Nos.:  
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a)

**Box No. III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)**

This International Searching Authority found multiple inventions in this international application, as follows:

Claims 1-16 relate to a cannula/catheter introducer with inner and outer tubular members, sealing means, release means, a needle holder with a release means where movement of the inner tubular member allows the release means to lock against the needle release means and vacuum retract the needle.

Claim 17 relates to a cannula/catheter introducer with inner and outer tubular members, retraction means for a puncture needle and a limit means to limit the travel of the inner tubular member, located adjacent a distal end of the introducer.

1. ☐ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
2. ☒ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

**Remark on Protest**

- ☐ The additional search fees were accompanied by the applicant's protest.
- ☐ No protest accompanied the payment of additional search fees.

**Box No. IV Text of the Abstract (Continuation of item 5 of the first sheet)**

A catheter/cannula introducer (41) is disclosed that allows a puncture needle (54) to be inserted into a catheter. Once the puncture needle has performed its function, it can shoot back into the device such that there is a reduced likelihood of needlestick injury. Vacuum is used to assist in the shoot back function.
